

PROFILE

Born in El Salvador, Sep. 26, 2001.

Since I was young, I always had a big interest in the near future technologies and how humans will get along with them, cellular devices, computers, communication, networks, etc. That is why I want to be part of the advance and modernization of my surroundings by creating high quality and easy to use software to solve the day-to-day problems due to the lack of new, fresh, easy to apply and well-planned solutions in this era that requires progress and big challenges.

SOFT SKILLS

- Leadership
- Communication
- Team Collaboration
- Problem Solving
